EXAMINER'S ACTION

The claims in this application are 1-56.

Newly submitted claim 1-9 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

The previously presented claims 1-9 involved two types of cells; the instantly presented claims are directed to a single cell and a cryopreservative.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claim 1-9 withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP 821.03.

Applicant is given one month from the date of this action to reinstate claims directed to the originally elected invention.

State of the art: Rinfret et al is cited to show that it is conventional to add cryoprotectants to blood prior to freezing (col. 2); therefore it would be obvious to add cryoprotectants to hematopoietic stem cells prior to freezing following the teaching of Rinfret et al.
